

WONDER GRIP® 1st AND 2nd ROUND WORKER SURVEYS ENHANCE SMETA AUDIT DECEMBER 2021.

"We are proud to be recognised as a Listening Employer by &Wider. From 2020-2022, we adopted Direct Worker Reporting, &Wider's continuous listening tool, which provides actionable results to drive material improvements in workers' lives and in the businesses that employ them".

"Congratulations on your third set of direct worker reporting results! The latest set of data shows a perfect score of 10/10 and 200 workers participating. A big well done to the team on site for motivating workers to participate".

"Another big congratulations on your fourth set of results for Wonder Grip. It's excellent to see over 250 workers participating in this round of data collection as well as workers responding candidly to the questions!"

Kerri, Emily and the &Wider team

During 2021/22 at WonderGrip® we have carried out our second year of Worker survey participation with &Wider, as an enhancement to our SMETA Audit Methodology.

We use the &Wider Worker Survey as a benchmark for monitoring and improving worker enhancement at Wonder Grip®.

"Wonder Grip® implemented Direct Worker Reporting (DRW) in early 2021 for the first year, and carried out two rounds during 2021.

"They invested time and energy to encourage worker participation and to date workers have been actively engaged. The system has no pass or fail and rather the aim of implementing DWR is to establish a channel for listening to workers so that on the back of those insights any improvements can be made. Wonder Grip®'s openness to exploring systems that go beyond compliance, like DWR, shows their responsiveness to the challenges of the pandemic and the need for additional sources of insights."

Kerri, Emily and the &Wider team
